

BLOSSOM SOLAR, MORROW COUNTY, OHIO

The Blossom Solar Facility is a proposed solar generation facility in northwest Morrow County, Ohio. The facility will have up to 144 MW alternating current nameplate capacity from equipment located in Washington Township in Morrow County.

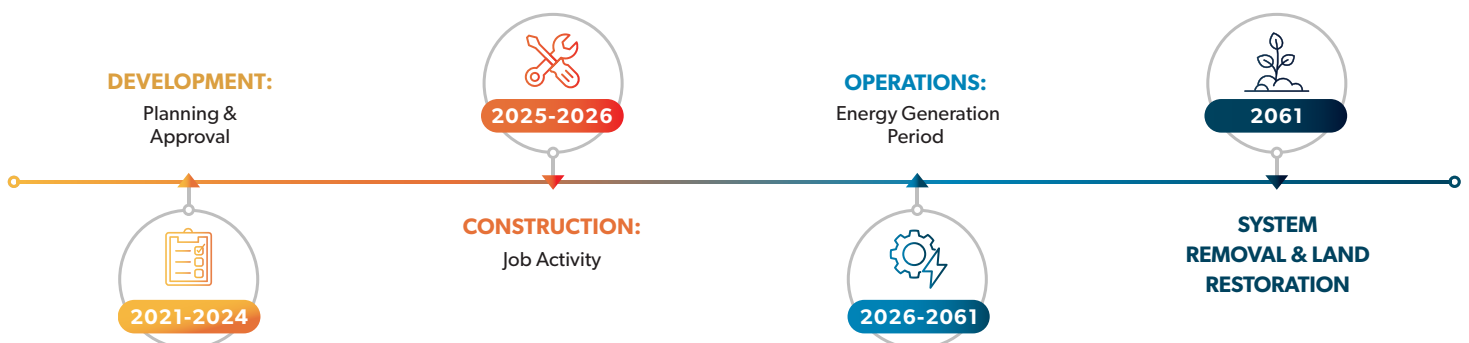

JOB CREATION

Blossom Solar's 12 – 14-month construction timeline will support approximately 350 full-time workers during peak activity during the construction phase. Locally, Morrow County will receive an estimated \$62 million in spending during the construction phase.

COMMUNITY BENEFITS

The Blossom Solar project will have a substantive fiscal impact on local government revenues. The construction of the solar facility will increase county tax revenue by \$1.2 million per year. The power generated by the facility will be equivalent to 23,222 homes' electricity use annually.

LASTING REVENUE

Over its 40-year operation, the facility will inject an estimated \$100 million into the regional economy through property taxes and landowner payments. Of that tax amount, \$20 million will be delivered to the Northmor School District.

HARNESSING THE SUN

Solar energy is a renewable and reliable source of power that strengthens the nation's energy portfolio. Modern solar technologies have become more cost-effective and efficient, making solar an attractive solution for clean and sustainable electricity.

The 144 MWac facility will utilize U.S.-manufactured solar panels and racking equipment. At the end of the project life, installed equipment will be removed, dismantled, and reused or recycled where possible. The land will be returned to pre-construction conditions.
